III. SPECIAL TOOLS LIST (Not applicable)		
IV. NATIONAL STOCK NUMBER - PART NUMBER INDEX	65	

Section I. INTRODUCTION

Scope. This manual lists spares and repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE), and other special support equipment required for performance of organizational, direct support, and general support depot maintenance of the Keco Model F36T4-Air Conditioner. It authorizes the requisitioning and issue of spares and repair parts as indicated by the source and maintenance codes.

General. This Repair Parts and Special Tools List is divided into the following sections:

Section II. Repair Parts List. A list of spares and repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of authorized parts. Parts lists are composed of sectional groups in numeric sequence, with the parts in each group listed in figure and item number sequence. Bulk materials are listed in National sequence.

Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized for the performance of maintenance. (Not applicable.)

Section IV. National Stock Number and Part Number Index. A list, in National Item Identification Number (NIIN) sequence, of all National Stock Numbers (NSN) appearing in the listings, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance. This index is followed by a cross-reference list of reference designators to figure and item numbers.

Explanation of Columns.

Illustration. This column is divided as follows:

(1) **Figure Number.** Indicates the figure number of the illustration on which the item is shown.

(2) **Item Number.** The number used to identify an item called out in the illustration.

maintenance, repair or overhaul of end item. Source codes are entered in the first and second positions of the Uniform SMR Code form as follows:

Code	Definition
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictated that a minimum quantity be available in the supply system.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent additional initial issues or outfitting. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting for specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which is because of probable discontinuance, shutdown of production facilities, or prove uneconomical to reproduce at a later time.
KD	An item of a depot overhaul/repair kit and not purchased separately. Depot defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.

- IF Item to be manufactured or fabricated at the direct support maintenance level.
- IH Item to be manufactured or fabricated at the general support maintenance level.
- ID Item to be manufactured or fabricated at the depot maintenance level.
- AO Item to be assembled at organizational level.
- AF Item to be assembled at the direct support maintenance level.
- AH Item to be assembled at general support maintenance level.
- AD Item to be assembled at depot maintenance level.
- XA Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
- XB Item is not procured or stocked. If not available through salvage, requisition.
- XC Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
- XD A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA and aircraft support items as restricted by AR 700-42.

(2) **Maintenance Code.** Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace and use the support item. The maintenance code entered in the fourth position will indicate one of the following levels of maintenance:

- C Crew or operator maintenance performed within organizational maintenance.
- O Support item is removed, replaced, used at the organizational level.
- F Support item is removed, replaced, used at the direct support level.
- H Support item is removed, replaced, used at the general support level.
- D Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item at the organizational level.
F	The lowest maintenance level capable of complete repair of the support item at the direct support level.
H	The lowest maintenance level capable of complete repair of the support item at the general support level.
D	The lowest maintenance level capable of complete repair of the support item at the depot level.
L	Repair restricted to designated Specialized Repair Activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) **Recoverability Code.** Recoverability codes are assigned to support items to indicate disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Verability

Definition

Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.

Reparable item. When uneconomically reparable, condemn and dispose at organizational level.

Reparable item. When uneconomically reparable, condemn and dispose at the direct support level.

Reparable item. When uneconomically reparable, condemn and dispose at the general support level.

Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.

Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.

Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

National Stock Number. Indicates the stock number assigned to the item and will be used for requisitioning.

Part Number. Indicates the primary number by the manufacturer which controls the and characteristics of the item by means of engineering drawings, specifications, standards and inspection requirements to identify an range of items.

NOTE

When a stock numbered item is requisitioned, the item received may have a different part number than the part being replaced.

Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in TM 5-4120-363-14. It is used to identify the manufacturer, distributor, or Government agency, etc.

the item. Items that are included in kits are listed below the name of the kit or set, with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column. If the part to be used differs between serial numbers of the same model, the effective serial number is shown as the last line of the description. In the Special Tools List, the initial basis of issue appears as the last line in the entry for each tool, special TMDE, and other special equipment. When density of equipment reported exceeds density spread indicated in basis of issue, the total authorization is increased accordingly.

g. Unit of Measure (U/M). Indicates the standard of the basic quantity of the listed item used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in., pr). When the unit of measure differs from the unit of issue, the lowest unit of issue that will eatist required units of measure will be requisitioned.

h. Quantity Incorporated in Unit. Indicates the quantity of the item used in the breakout shown in the illustration figure, which is prepared for functional group, subfunctional group, assembly. A "V" appearing in this column indicates that no specific quantity is applicable (e.g., shims, spacers, etc.).

4. Special Information.

a. Usable on codes are shown in the description column. Uncoded items are applicable to all models.

b. Detailed manufacturing instructions for items source coded to be manufactured are found in TM 5-4120-363-14. Materials required to manufacture items are listed in the Bulk Material Group of this manual.

c. Detailed assembly instructions for items source coded to be assembled are found in TM 5-4120-363-14. Assembly components are listed immediately following the item to be assembled.

d. Repair parts kits and gasket sets appear as the last entries in the repair parts listing for each figure in which its parts are listed as repair parts.

e. The following publication pertains to

5. How to Locate Repair Parts.

a. When National Stock Number or Part Number is Unknown:

(1) *First.* Using the table of contents, determine the functional group within which the item belongs. This is necessary since illustrations are prepared for functional groups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the functional group to which the item belongs.

(3) *Third.* Identify the item on the illustration and note the illustration figure and item number of the item.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Part Number is Known.

(1) *First.* Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in NIIN sequence followed by a list of part numbers in alphabetic sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the repair parts list.

SAMPLE

IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:

In line 6 of paragraph 2-1 a the manual states the engine has 6 cylinders. The engine on my set only has 4 cylinders. Change the manual to show 4 cylinders.

Callout 16 on figure 4-3 is pointing at a bolt. In key to figure 4-3, item 16 is Callout a shim - Please correct one or the other.

I ordered a gasket, item 19 on figure B-16 by HSN 2 910-00-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered, so the HSN is wrong. Please give me a

The Metric System and Equivalents

Linear Measure

1 meter = 10 millimeters = .39 inch
 1 meter = 10 centimeters = 3.94 inches
 1 meter = 10 decimeters = 39.37 inches
 1 meter = 10 meters = 32.8 feet
 1 meter = 10 dekameters = 328.08 feet
 1 meter = 10 hectometers = 3,280.8 feet

Weights

1 gram = 10 milligrams = .15 grain
 1 gram = 10 centigrams = 1.54 grains
 1 gram = 10 decigrams = .035 ounce
 1 gram = 10 grams = .35 ounce
 1 gram = 10 dekagrams = 3.52 ounces
 1 gram = 10 hectograms = 2.2 pounds
 1 gram = 100 kilograms = 220.46 pounds
 1 metric ton = 10 quintals = 1.1 short tons

Liquid Measure

1 centiliter = 10 milliliters = .34 fl. ounce
 1 deciliter = 10 centiliters = 3.38 fl. ounces
 1 liter = 10 deciliters = 33.81 fl. ounces
 1 dekaliter = 10 liters = 2.64 gallons
 1 hectoliter = 10 dekaliters = 26.42 gallons
 1 kiloliter = 10 hectoliters = 264.18 gallons

Square Measure

1 sq. centimeter = 100 sq. millimeters = .166 sq. inch
 1 sq. decimeter = 100 sq. centimeters = 16.5 sq. inches
 1 sq. meter (centare) = 100 sq. decimeters = 10.76 sq. feet
 1 sq. dekameter (are) = 100 sq. meters = 1,076.4 sq. feet
 1 sq. hectometer (hectare) = 100 sq. dekameters = 2.47 acres
 1 sq. kilometer = 100 sq. hectometers = .386 sq. mile

Cubic Measure

1 cu. centimeter = 1000 cu. millimeters = .06 cu. inch
 1 cu. decimeter = 1000 cu. centimeters = 61.02 cu. inches
 1 cu. meter = 1000 cu. decimeters = 35.31 cu. feet

Approximate Conversion Factors

To change	To	Multiply by	To change	To	Multiply by
centimeters		2.540	ounce-inches	newton-meters	
meters		.305	centimeters	inches	
meters		.914	meters	feet	
kilometers		1.809	meters	yards	
square centimeters		0.451	kilometers	miles	
square meters		.093	square centimeters	square inches	
square meters		.836	square meters	square feet	
square kilometers		2.590	square meters	square yards	
square hectometers		.405	square kilometers	square miles	
cubic meters		.028	square hectometers	acres	
cubic meters		.765	cubic meters	cubic feet	
milliliters		29.673	cubic meters	cubic yards	
liters		.473	milliliters	fluid ounces	
liters		.946	liters	pints	
liters		3.785	liters	quarts	
grams		28.349	liters	gallons	
kilograms		.454	grams	ounces	
metric tons		.907	kilograms	pounds	
newton-meters		1.356	metric tons	short tons	
newton-meters		.11298
